

ELLE MALCOLMSON

ANALYST

SUMMARY

I am an Analyst with over 6 years' experience working in the higher education sector, with a particular focus on open access, scholarly communication and impact. I am analytical, detail-orientated and able to understand complex issues at a detailed level. I am also skilled at interpreting policies, identifying compliance requirements, compliance data capture, policy challenges and how processes can be developed to support delivery of policies. I have a thorough understanding of REF, having worked supporting both the Outputs and Impact elements of a REF2021 submission. I have a particularly thorough understanding of libraries, open access, publishing and funder mandates having worked managing and reporting on a UKRI open access block grant. I also have a thorough understanding of research impact having worked to identify, develop, write up and gather evidence for Impact Case Studies for submission to REF2021. Working in central, faculty and school based roles within a university has given me great insight into the interconnectedness and complexities of how universities operate and the often competing strategic, operational and policy factors driving everyday activity for researchers and students.

EXPERIENCE

Education Consultant

Inspire Outdoors | 2016 - 2022

REF Impact Officer

University of Nottingham | 2019-2021

Research Librarian
